**DETAILED ACTION** 

Response to Amendment

1. Applicant states that claims 71-77 were filed with a preliminary amendment on May 28,

2002. After reviewing the preliminary amendment filed 5/28/02, examiner discovered that there

were only claims 40-70 included in the amendment. As for the amended claim 77 of the amendment

filed 3/20/03, the amendment will not be entered. Newly added claims 78-91 were then renumbered

to 71-84 by the clerical staff under Rule 126.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a parson

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

3. Claims 29-33, 37-43, 46-48, 53-56, 58-60, 62-63, 67-68 and 70-82, are rejected under 35

U.S.C. 103(a) as being unpatentable over Bergman [US 1,353,711] in view of Feinberg [US

2,509,187].

Bergman discloses an electric welding apparatus comprising:

Application/Control Number: 09/842,002 Page 3

Art Unit: 2832

- a core structure [26, 27] including two center pole pieces [24, 25] defining an air gap [see

figures 4-6] therebetween, wherein the two pole pieces having end surfaces, wherein each of the pole

pieces having two outer edges spaced from one another; and

- a winding [21].

Bergman discloses the instant claimed invention except for the specific structure of the pole

piece/air gap.

Feinberg discloses a choke structure [figures 1-4] comprising:

- a core structure [figures 1-3] including two pole pieces [21, 22] defining an air gap

therebetween, wherein each of the pole pieces having two outer edges and a middle portion position

therebetween; and

- at least one winding [13, 14].

wherein at least one of the middle portions being substantially V-shaped.

wherein the air gap having a width therebetween the middle portions and the end surfaces

of the two pole pieces that is greater than a width between at least of the two outer edges of the pole

pieces.

wherein the air gap having a shape that is substantially symmetrical.

wherein the middle portions having substantially non-perpendicular oriented surfaces.

It would have been obvious to one having ordinary skilled in the art at the time the invention

was made to use the pole pieces/air gap design of Feinberg in Bergman for the purpose of controlling

the inductance and the magnetic flux of the device.

Application/Control Number: 09/842,002 Page 4

Art Unit: 2832

The specific size of the core structure would have been an obvious design consideration based on the intended application use.

The specific shape of the air gap would have been an obvious design consideration based on the desired inductance applications.

4. Claims 36, 45, 66 and 83-84, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergman in view of Feinberg as applied to claims 29, 40, 58 and 71 above, and further in view of Saitoh et al. [US 5,204,653].

Bergman in view of Feinberg discloses the instant claimed invention except for the air gap at least partially filled with a low permeability material.

Saitoh et al. discloses an electromagnetic induction device including a core structure [50] having two pole pieces [51] and an air gap formed therebetween, wherein a low permeability material filled the gap.

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to fill the air gap of Bergman's device, as modified, as suggested by Saitoh et al., for the purpose of controlling the magnetic field.

## Response to Arguments

5. Applicant's arguments with respect to claims 29-31, 33, 37-43, 46, 48, 53-56, 58-60, 62-63, 66-68, and 70-84 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/842,002 Page 5

Art Unit: 2832

## Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tuyen T. Nguyen whose telephone number is (703) 308-0821.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Elvin Enad, can be reached at (703) 308-7619. The fax number for this Group is (703)872-9318 before the final office action, if the response is after final office action the fax number is (703)872-9319.

Any inquiry of a general nature or relating to status of this application of proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
